

Product Specifications

Protective Isolation Face Shield

DeltaTrak's Protective Isolation Face Shield helps prevent transmission of COVID-19 by offering full coverage (from forehead to chin) against saliva droplets. It is highly transparent and includes an anti-fog coating that greatly improves visibility. With its sturdy and lightweight shield, it can be worn for a length of time and easily cleaned throughout use. The foam padding provides additional forehead comfort during long-term wear.

Schools

The face shield provides sturdy protection and high transparency and visibility for teachers as they interact with students during classroom activities.

Clinics

Ideal for shielding medical and office staff during patient check-ins and/or examinations. High visibility and transparency allows for improved patient interaction.

Food Service

Provides safety and coverage for service staff when interacting with customers. The strong anti-fog coating allows for clear view of customers which helps improve the customer service experience.
