

HiTemp140-TC

High Temperature Data Logger with Thermocouple Connector

The HiTemp140-TC is a versatile high temperature data logger featuring an SMP thermocouple connector. Compatible with a wide variety of thermocouple probes, this data logger is capable of measuring temperature as high as +1820 °C (+3308 °F) and as low as -270 °C (-454 °F) (probe dependent).

All of MadgeTech's HiTemp140 data loggers are made of food grade stainless steel and can be placed in environments with temperatures as high as 140 °C (284 °F). The operating range of the data logger body can be extended to higher temperatures when used with MadgeTech's thermal barrier options and suitable probe.

Using the MadgeTech 4 Software, starting, stopping and downloading the HiTemp140-TC is simple and easy. To use, simply place the HiTemp140-TC in the IFC400 or IFC406 docking station (sold separately). Using the software, an immediate or delay start can be chosen, as well as the reading rate. Start the data logger, remove it from the docking station and the device is ready to be deployed. Graphical, tabular and summary data is provided for analysis and data can be viewed in °C, °F, K, °R, or mV. The data can also be automatically exported to Excel® for further calculations.
